

Beatport's Mobile App is now available on Android

(Berlin - February 8th, 2022) - Beatport, the global leader of music for DJs, producers, and their fans, announced today, the Beatport Mobile App is now available on Android.

Last June, we introduced a powerful new mobile app, which is designed to empower DJs' creative workflow by revolutionizing playlist management and mobile-friendly music search for electronic music fans. Android users now have access, and can bring their Beatport playlists and libraries anywhere with the Beatport Mobile App. It is available on the Google Play App Store and compatible with all Android devices.

The [Beatport Mobile App](#) is the perfect way to manage your Beatport library. Effortlessly create playlists on the go, and discover new music as you dig into our genre pages, top releases, and expertly curated charts from our staff and some of dance music's biggest acts. If you're looking to add a few fresh tracks to your set just before your gig, or to create the perfect playlist, the Beatport Mobile App has you covered, and will help you harness inspiration whenever and wherever it strikes.

The app is an extension of Beatport's entry-level DJ streaming plan, which offers untethered access to Beatport's 9-million song catalogue with full-track playback and access to Beatport DJ — a web app that allows you to organize and audition tracks right from the comfort of your browser.

To use the Beatport Mobile App, subscribe to [Beatport \(\\$9.99/month\)](#), or sign up for our DJ streaming performance tool, Beatport LINK (see plans [here](#)).
